

# Sub-Zero and Wolf Green Facts

---

As our consumers become more and more aware about the food they eat – organic versus processed, locally grown versus shipped – they are also seeking ways to improve the life of the food they store, and improve energy conservation within their kitchens. At Sub-Zero and Wolf, we believe that it is important to design, manufacture and use our products in an environmentally responsible manner. We strive not to meet, but rather exceed, federal standards for energy efficiency.

## Sub-Zero Energy Star Rated Appliances:

Sub-Zero 601R/601RG/601F Refrigerator  
Sub-Zero 611 Refrigerator  
Sub-Zero 650  
Sub-Zero 700BR  
Sub-Zero UC-24R  
Sub-Zero UC-24RO

## Wolf's Energy-Efficient Appliances Include:

Wolf Electric Cooktops  
Wolf Induction Cooktops  
Wolf L Series Electric Ovens  
Wolf E Series Electric Ovens

Our commitment to environmental responsibility is also evident in the ways in which we manufacture our cooking and refrigeration appliances. From the materials used to the processes followed – everything is done with an eye toward minimizing environmental impact.

## Green Facts - Manufacturing:

- Our manufacturing facilities have established scrap reduction objectives to use recyclable materials more efficiently.
- Wastewater is not produced in the manufacturing process for either Sub-Zero or Wolf appliances.
- Our manufacturing facilities have substantially reduced the use of ozone forming hydrocarbon solvents.
- Returnable containers are used to reduce waste from vendor packaging.
- Nearly all industrial vehicles used in the facilities are electric. A few specialty vehicles use clean burning propane.
- All refrigerant is recovered during the manufacturing process. The refrigerant used is non-ozone depleting.
- Up to 50% of the plastic used in our refrigerators is recycled content.

## Green Facts - Compliance:

- Manufacturing facilities are categorized as “Small Quantity Generator” by the EPA.
- Sub-Zero, Inc. has significantly reduced Volatile Organic Compound (VOC) emissions at its manufacturing facilities.
- All Sub-Zero and Wolf locations comply with EPA and state air emission standards.
- The Wisconsin Responsible Power Management Program recognized Sub-Zero for choosing energy efficient motors.
- Sub-Zero and Wolf are partnering with international distributors to become aligned with the international WEEE recycling standard.
- We adhere to The International Plant Protection Convention's (IPPC) ISPM 15 guidelines governing the treatment of solid wood packaging.
- Sub-Zero is using chilled water storage system to charge building cooling systems at night.
